NOTE.—The last order drawn for DeWolfe, Fiske, & Co. was over drawn \$11.38 making the net expenditure for library \$483.01.

As the above appropriation was for the express purpose of purchasing new books, the sum of \$202.00 has been paid out of the Selectmen's Incidentals, as follows:

April	4	J. G. Roberts & Co., binding books	\$19 20
		W. F. Gillette, attendance etc.	26 00
		Rockwell & Churchill, catalogues	40 30
July	2	W. F. Gillette, attendance etc.	28 25
		R. T. Russell, library slips	2 50
		J. G. Roberts & Co., binding books	2 40
		D. L. Veasey, carrying books	5 50
Oct.	3	W. F. Gillette, attendance etc.	20 50
		C. L. Davis, carrying books	12 50
Dec.	31	W. F. Gillette, attendance etc.	35 50
		J. G. Roberts, binding books	9 35
			<hr/>
			\$202 00

The Auditor advises that for the coming year an appropriation be made to include these incidental expenses.

SELECTMEN'S REPORT.

In presenting the annual report of this Board, we desire to call the attention of our citizens to the changes taking place in the town, to the increasing population, requiring increased expenses, and ask them to remember that the rate of taxation depends upon the appropriations made by their votes.

We would ask them to remember also that a prompt payment of taxes would go far towards improving our financial condition, and we regret that some of our most prominent citizens have failed to set a good example in this respect. We believe it is wise to make all our appropriations at the annual meeting, then our Assessors can cover everything in their estimates, and each year will take care of itself. To save making some small appropriations this board has paid out of its incidentals, bills which do not properly belong there. The plumbing changes in the Town Hall overrun the appropriation about \$160.00, but it was a work of necessity, and we paid it. The Trustees of the Public Library contracted bills of some \$200.00 which were also paid from our incidentals, but another year we would not advise the contracting of any bills to be paid out of the Selectmen's appropriation, unless with the consent of that Board.

We have reclaimed and improved the old part of the cemetery, but this has been nearly covered by the sale of lots, although the amount received does not appear to our credit while the sum expended is charged to our appropriation. The highways have drawn upon us as noted hereafter. Few years could be relied on to have

sufficient balance to take care of such matters, and we are gratified to be able to make this showing for 1892.

The Board has endeavored to act for the best interest of the town, and every vote taken has been unanimous, a record which gives much pleasure and satisfaction to its members.

We would recommend an appropriation of \$5,000 for our incidentals for 1893.

HIGHWAYS.

By vote at the annual meeting in March, the highways of the town came under the charge of the Selectmen early in the spring. We found them in such a condition that it was a serious question where to begin, and a more serious question where to leave off.

In our choice of a superintendent we believe the town has gained a painstaking and valuable official, whose work speaks for him better than anything we can say in this report.

We started on the principle of building thoroughly, and soon found the \$3,400 balance in our hands inadequate, and even with the appropriation of \$1,200, partly owing to the unusual heavy rains, causing wash-outs far in excess of previous years, we were unable to accomplish all the work originally planned. Rather than ask the town for another appropriation, we decided to pay from our incidentals sufficient to place the streets in shape for the winter.

Next year will require quite a large appropriation, there being several heavily travelled streets in a very bad condition, notably Lincoln Ave., from the square in Ward 3 to the Revere line, and from Kent's Hill to Bristow St.

We would recommend strongly the purchasing of land for gravel pits by the town, thereby making a sav-

ing in the end of many dollars, to say nothing of the convenience. On this point we shall have some plans to present at the annual meeting.

We would recommend an appropriation of \$5,000 for 1893.

SALEM TURNPIKE.

Owing to the Lynn & Boston R. R. Co. changing their tracks on this street, it was late in the year before we could commence work in this department, but the verdict of all interested has been that our Superintendent has improved this highway in a very efficient manner. We have expended \$941.47, of which the county repays 75 per cent.

We recommend an appropriation of \$1,000 for 1893.

STREET LIGHTS.

This is another department which has undergone a change from our methods of previous years. By vote of the town we negotiated for the introduction of the electric system, and after looking into the matter and learning from other towns and cities their experience, we concluded a contract for arc lights at \$72.00 per light per year. This is the same rate paid by Swampscott and Nahant, and we cover more territory.

In locating the lights we endeavored to place them to the best advantage to the most people, and have continued the oil lamps in places not reached by the electric. To continue this plan will require an appropriation of \$700 in addition to the \$3000 required for the electric system.

FIRE DEPARTMENT.

For a report of the business part of this department, we refer to the Chief Engineer. We regret that early

in the spring a majority of the members of the company located in Ward 3, not satisfied with an appointment (the only one which is in the hands of this board) withdrew from the department. Complaint was made that the withdrawing members had taken property belonging to the company and the Chief was notified to order its return. This demand not being complied with, the matter was placed in the hands of the town counsel.

Members have withdrawn before but have always left property they had used for their successors, and we see no reason why one member should have different rights from another. Among the articles taken were a banner and uniforms presented to the company soon after its formation, articles certainly of no value to individuals.

Since the close of the year the town has been visited by the severest fire in its history, and as it occurred so near the year 1892, we desire to include it in this report. The work performed by our fire department at the burning of Chatfield block was of the highest quality, the members of Hose 2 fighting manfully and well, and those of Hose 1 and 3 ably lending their aid and proving that, notwithstanding some unkind and unwarranted criticisms, the men of our fire department can be depended on for honest, steady work. We would also speak in the highest terms of the assistance rendered by the Lynn Fire Department and by many of the former members of Hose 2 and citizens. The courtesy of the Lynn Department in promptly replying to our call for assistance was most gratifying to this board and to the town.

Our department has many needs, chief of which is a proper fire alarm system connecting the three villages. We also need more hose, a ladder truck, and many smaller accessories, such as poles, and implements for

use on the ruins after a fire, and we would recommend an appropriation sufficient to enable the department to obtain such additions as are necessary to the successful carrying on of its work. Another need is proper horses to be depended on when required, and if the town could make arrangements to relieve this want, it would greatly improve the service.

POLICE AND LIQUOR ENFORCEMENT.

Saugus, we believe, has reached the time when it is necessary to have a police department, and the men connected with it sufficiently paid so they will not be obliged to depend on other work for their living. As the enforcement of the liquor law and police matters are closely connected, we decided to combine the two appropriations and lay the foundation of a department heretofore neglected, for although our constable has acted to some extent as a Chief of Police he has never before this spring been given the power which the name implies.

Your board appointed Mr. Charles F. Clark to the head of this department, and we are confident had Mr. Clark not resigned to accept a more remunerative position, he would, with his knowledge of the work and the town, together with full power to act, have proved that our choice was a wise one. In our second choice we were disappointed, and valuable time was lost, but after securing the services of our present Chief, Mr. Frank W. Joy, who was appointed late in the summer, after the resignation of Mr. White, we believe the citizens will admit that law can be enforced in Saugus.

We do not claim there is no liquor sold in our town, but we do claim it is confined to very close quarters, and with proper support, our present Chief, who is a conscientious officer, will be able to place Saugus among the law enforcement towns. One year ago there were

six houses in town where liquor was sold freely, and at least five of these places were far from respectable in other respects. To-day there are none where liquor is openly sold and those which are not closed are watched so carefully that another year we hope to still further free our town of these nuisances.

We would advise the appointment of three regular men on salary to give their whole time and attention to police work.

The City of Lynn appropriation for this department is \$1,000 for each 1000 inhabitants, but we believe \$2,500 will be sufficient for Saugus.

FINANCIAL.

While we cannot show a great reduction of the town debt, we do congratulate the town on a more healthy condition of our assets. We have abated the old balance of the uncollected tax of Warren P. Copp account. This with the appropriations of the summer after the assessments were made would cause our deficiency to increase, and as the figures make about the same showing as in 1891 we see no reason for any other feeling than one of satisfaction. Our loan in anticipation of taxes was placed at 3 1-2 per cent., a very low rate of interest.

Respectfully submitted,

EDWARD BREWER, CHARLES FLORENCE, MARION V. PUTNAM,	}	<i>Selectmen.</i>

JOHN ARMITAGE, }
 GEORGE FAULKNER. } *Appraising Com.*

REPORT of the WATER COMMISSIONERS.

At a Town Meeting called October 9, 1891, the sum of ten thousand, five hundred (\$10,500) dollars was appropriated to extend our water pipes through Baker street and Western avenue in Cliftondale, and portions of Pleasant Hills.

We took up the unfinished work in the spring, having on hand five thousand, four hundred and twenty-six dollars and eighteen cents (\$5,426 18) from the above appropriations, and have finished the work, as the following report will show. This work was done by Messrs. Goodhue & Birnie of Springfield, Mass.

At a Town Meeting called March 22, 1892, the following appropriations were made to lay water pipes:—

In Tuttle street, two hundred dollars (\$200); Elm street, seven hundred dollars (\$700).

October 5, the following vote was passed by the Town:—

Voted, that the Water Commissioners have authority to extend the water pipes when in their judgment it is for the best interests of the Town so to do, and the 6 per cent. guarantee bond is filed, and that five thousand dollars be appropriated for such purposes. This gave us the following amount of money with which to do our work this season:—

Balance as above stated	.	.	.	\$5,426 18
Tuttle street	.	.	.	200 00
Elm street	.	.	.	700 00
For Extension purposes	.	.	.	5,000 00
Horton street and Vermont avenue	.	.	.	500 00
Total	.	.	.	<u>\$11,826 18</u>

After the October meeting we got three bids for the work to be done this fall and winter. Mr. John T. Langford of Boston being the lowest bidder, we awarded the contract to him Oct. 31st. We were obliged to pay an advance of fifty cents per ton on our pipes owing to the lateness of the season; this advance, as you will see, amounts to \$43.62, we having laid a fraction over 87 tons.

Up to this time our engineer upon the works had been Mr. I. K. Harris of Lynn. As we have an engineer living in our town, one of our citizens, we thought that if he could do the work as well we would give it to him, so at a meeting of our Board held Nov. 26th, at which all members were present, we discharged Mr. Harris and employed Mr. Levi G. Hawkes, on account of which Mr. Wilbur F. Newhall resigned from the Board of Water Commissioners.

We are pleased to state that owing to the remarkably fine weather we have been able to lay water pipes up to the middle of December, thereby entirely completing the work laid out.

Heretofore all bills for repairs upon our works have been paid out of the Selectmen's incidental account. We would recommend that the Town make an appropriation of \$300 for repairs, that the total expense of this department appear under one head. We would also recommend that the Town appropriate, by water loan or otherwise, the sum of \$5,000 for extension purposes the coming year.

The pipes we have laid this fall and winter weigh as follows: 53 1-10 pounds to the foot for 8 inch, 35 7-10 pounds for 6 inch, 23 pounds for 4 inch, which is 3 1-10 pounds to the foot heavier for 8 inch, 7-10 pound for 6 inch and 1 pound for 4 inch in excess of what our contract called for, for which we pay nothing extra. We have up to this date, Dec. 31, '92, 445 service connections.

Up to this time, Dec. 31, we have been unable to consummate a new contract for water with the city of Lynn but are in hopes of being able to in the near future.

Report of Engineers of Fire Department.

I herewith present my fifth annual report of the expenses and condition of the Department with a list of all fires and alarms which have occurred during the year; loss and insurance as near as can be estimated; also recommendations for the ensuing year.

MEMBERSHIP.

The number of members is fifty-four:—Board of three engineers, two companies of twenty each, Hose 1 and 3, and one company of eleven, Hose 2.

EXPENDITURES.

The appropriation for the year was seven hundred dollars. Paid for labor on hydrants \$19.45, supplies \$42.32, rent of house in Ward 3 \$200, labor \$76.98, fuel \$114.40, Lynn Water Board \$58.00, use of horse \$12.50, repairs on wagons \$121.80, use of wagons \$8.00, electric wiring hose house No. 1, \$19.13, key boxes, \$2.25, grading around hose house No. 3, \$10.00, repairs on locks, \$1.59, blankets, \$13.50; Total \$699.92.

APPARATUS.

The apparatus consists of three one horse hose wagons, 6 Babcock chemical extinguishers, three 45 ft. extension ladders, three 20 ft. roof ladders, six 18 ft. extension ladders, three jumping nets.

We have 2,500 ft. of hose, about 800 ft. first class, the most of the balance is ordinary, some of it quite poor, the first 800 ft. is all that would stand steamer service.

There are one hundred and fifteen hydrants, twenty having been added this year.

FIRES AND ALARMS.

Jan. 9. Still alarm from Ward 7, Lynn, caused by steam escaping from Geo. Faulkner's morrocco factory.

March. 12. Baxter Wiley's fish market on Cross St., Ward 2. Total loss, building \$300, Ins. 300, contents \$100, no insurance; cause, children and matches.

March 29. Needless alarm for burning grass on premises of W. L. Crafts, Winter Street. No damage.

June. 1. Alarm for fire in house of D. M. Chute, Lynnhurst, loss on house \$40; Ins. \$1,500; loss on furniture \$15; Ins. \$1000. Box 19, Lynn Fire Alarm was pulled in for this fire and Chief Downing and his Department responded.

Oct. 9 there was an attempt to burn an unoccupied dwelling house on Park Ave., owned by Chas. A. Seavey, Pelham, N. H. No damage.

Oct. 12. Fire in the rattan factory of Geo. A. Webster, Pleasant Ave., Ward 3, caused by overturning of lamp, loss on building \$70; Ins. \$600; loss on stock \$600; Ins. \$800.

Oct. 13. Alarm for fire in house of Wallace Rhodes, Lincoln Ave., Ward 4, loss \$100; Ins. 2,500. Caused by kerosene stove.

Oct. 30. Alarm for fire in chimney of house occupied by Thomas Gibbons, Lincoln Ave., Ward 3. No damage.

Nov 24. Fire in dwelling of C. P. Stanborn, Belmont Ave., Ward 4. Cause unknown. Loss on building and contents \$700, Ins. \$3200.

The members responded to fires in the woods Apr. 3, rear of Hesper St., Apr. 7, Lynnhurst, Apr. 9, rear of Town Farm, Apr. 17, Oaklandvale, Apr. 18, Essex and Turnpike, Apr. 24, Baker's Hills.

RECOMMENDATIONS.

In our preceding reports we have recommended the introduction of a system of Electric Fire Alarm. We would again urge the citizens to consider this request seriously. It makes no difference how good or how poor a department you have to depend upon, you cannot expect good service from them unless you have some

way of notifying them when their services are needed. Our apparatus is limited and there is all the more necessity of a prompt alarm, as the first few minutes are of great value.

At the fire in Lynnhurst it was necessary for a person to run at least one half mile to call on Lynn for help.

At the fire in the rattan factory the party had to harness a horse and drive about three fourths of a mile to ring an alarm.

At the fire on Belmont Avenue the party who gave the alarm ran at least three fourths of a mile. Another difficulty is the bell on the school house in Ward 3, it is so small and situated so that it is impossible to hear it at any great distance. We hope when the committee report plans for a new school building they will consider this and make arrangements for a large bell that can be heard over the whole town.

This system can be introduced by making five annual payments, so that this will not increase our taxes very much.

A Hook and Ladder carriage is very much needed. We have a few ladders but no way of getting them to a fire. We have been very fortunate in the past, but it is not always safe to trust to good luck in fires, as the bad is more often to the front. Our hydrant pressure is not very high, especially in the daytime when there is a great draft upon it, and if we have a fire requiring streams from more than two lines of hose to any height we must carry our lines up on ladders.

What might be of still greater importance is the rescuing of any person that might be cut off from escape from any upper story that was on fire.

We need also hooks and chains for the pulling down of walls.

We would recommend that a carriage be purchased and located in the house of Hose 1, Saugus Centre.

The town should purchase 1000 ft. of first class hose, as in case of fire we have not got an extra length to put on our wagons; but have got to take the chance of a short allowance on each wagon, which is not a safe proceeding.

We think the time has arrived when the town should provide horses to draw our apparatus to fires. We are very much handicapped, especially in Ward 3, where in the daytime we have no horse to depend upon. The horse we use is out of town all day and is quite a distance from the apparatus in the night, so that it is very unreliable service.

Horses could be kept in the houses and worked on the highway and not be any more expense to the town than hiring. This plan is adopted by nearly all the towns in this vicinity, why cannot we?

Another important subject to consider is the paying of firemen for services performed. Since the department was organized five years ago no member of the three companies has received one cent for any fire service. All the recompense that has been received is criticism from side-walk firemen and newspaper reporters "who know-it all." We would suggest that the article in the Public Statutes exempting poll taxes of the members of the department be adopted, and also provision be made for paying the members for time while employed in actual service.

We would extend our thanks to the Board of Selectmen for courtesies shown us during the year, and also to all the citizens who have *assisted* us in the discharge of our duty. We wish also to thank the members of the

department for the courteous treatment received from them, and also for the prompt and able manner in which they have discharged their duties during the year.

Respectfully submitted,

CHARLES I. HITCHINGS,

Chief Engineer.

C. I. HITCHINGS,
JAMES F. PRATT,
WALTER S. DODGE,

Board of Engineers.

REPORT OF BOARD OF HEALTH.

SAUGUS, MASS., Jan. 1, 1893.

The Board of Health respectfully submits its annual report for the year 1892.

The Board was organized as follows :

GEO. M. GALE, M. D., Chairman ;

J. N. KNIGHT, M. D., Secretary ;

CHAS. F. CLARK, Health Officer.

Regular meetings of the Board are held at the Town Hall on the last Monday of each month at 2 p. m.

The rules and regulations previously made and published by the Board of Health in 1891 for the public health and safety were adopted by this Board.

At the adjourned town meeting of Saugus, March 22, 1892, Article 37, relating to an appropriation for the purchase of a suitable wagon and apperatus for cleansing cesspools and vaults, was referred to the Board of Health. In compliance with the above we wish to say that we have investigated the means employed in other places and find that a tank-wagon could not be used to advantage in Saugus, but that air-tight barrels would be best adapted for our use. We would recommend that at the next town meeting an appropriation for \$250 be made for the purchase of a suitable wagon and apparatus for cleansing cesspools and vaults, consisting of 12 air-tight barrels, and other articles required for the same, and to be under the control of the Board of Health.

All privies and vaults should be cleansed at least once a year.

We have to record the following cases of contagious diseases reported during the year :

Scarlet fever	.	.	.	23 cases.
Diphtheria	.	.	.	2 cases.

mostly of a mild type.

In one case arrests have been made, and the parties were convicted in the Lynn Police Court, for illegally maintaining a baby-farm in Saugus; the house had been condemned by the Board of Health in 1891 on account of bad drainage and a general unhealthy condition of the house and premises.

Several licenses have been granted parties during the year to maintain a boarding house for infants, the license permits the boarding of not more than two infants, subject to the provisions of Chapter 318, Acts of 1892.

Complaints have been made to the Board for abatement of nuisances in different sections of the town. Investigations have been made and notices served to abate said nuisances, which in the majority of cases have been promptly attended to, and as a rule the owners and occupants of premises comply fully with our request. Most of these cases, on investigation, revealed full privy vaults, cesspools and obstructed drain pipes: we also found some leaking of sinks in cellars and collection of garbage in yards. Notwithstanding a few cases as mentioned above, we consider that the general sanitary condition of the town has been good for the past year. During the year we have escaped the visitation of any serious epidemic. What will soon be required as the town progresses, to put us in a thorough sanitary condition will be a general system of sewerage, which an introduction of a public water supply generally demands.

Massachusetts was the first State in the Union to establish a State Board of Health, which was about 22 years ago. The special object of a Board of Health is to work for the public health and safety, with a special view to prevent and suppress all epidemics. When epidemics occur their full force is felt in densely packed tenement-houses, where the pure air cannot freely circulate, and where the sunshine is excluded. It is there

that the germs of disease find the condition most favorable for their growth and development. Pure air and sunshine are protectives against infection, and indispensable to perfect health.

In consideration of the appearance of epidemic cholera during the past year in foreign cities, and the possibility of its appearance in this State, we issued a circular requesting that great precautions be taken to keep all premises in a thorough sanitary condition. All measures of cleanliness taken beforehand are of more importance as a protection of a community against any epidemic than removal or disinfecting of filth after the disease has made its appearance. The presence of imported cases of disease is not likely to prove dangerous to any community if the place is in a thoroughly good sanitary condition.

It is still apprehended in the minds of some physicians that unless great precautions are taken there is liable to be a visitation of cholera in the spring or summer, as the disease still continues to prevail in Hamburg and Prussia. This shows that great care is required to prevent its gaining a foothold on this side of the Atlantic.

We would call the attention of all owners and occupants of premises to the great importance of perfect cleanliness in and about all dwellings; the cellars should be kept clean, dry and free from all decaying matter and well ventilated. Stagnant water should not be allowed to remain near your place of residence, no garbage or other refuse matter should be allowed to accumulate in your yards, nothing that produces obnoxious or injurious odors about the premises should be allowed, thereby polluting the air and producing a predisposing cause of diphtheria, scarlet fever, sore throat, cholera infantum and other conditions of ill health.

If the cellar is damp, neuralgia, rheumatism and affections of the lungs are liable to appear, also the conditions of all stables, cesspools, water-closets and all the premises should be kept clean, see that drains are not obstructed, well ventilated and trapped and drinking water should be free from contamination.

Impure air and water are the conditions which favor the spread of disease after it is once established. Much ill health can undoubtedly be prevented by careful attention to the suggestions given above.

GEO. W. GALE, M. D.,

Chairman.

CONSTABLE'S REPORT.

The whole number of arrests made during the year was thirteen. Of this number four for drunkenness, one for non-support; two, assault and battery; one, larceny; one, adultery; one, fornication; two, keeping baby farm without license; one, cruelty to cow. Persons committed to Danvers Insane Asylum, two. One search warrant served for the illegal sale of liquor.

CHARLES F. CLARK, *Constable.*

REPORT OF CHIEF OF POLICE.

FOR THE YEAR ENDING DEC. 31, 1892.

Whole number of arrests, 14, as follows:—

Violation of town by-laws	3
Maintaining a liquor nuisance	3
Assault on officers	2
For out of town officers	1
Vagrants	2
Drunk	2
Larceny	1
Number of search warrants served for liquor	33
Number of places liquor found in	10

I would recommend that the town employ three regular patrolmen, also that the town procure a light team for the use of the police department, as it cost the town a great deal more for team hire the last year than it would cost to keep a team.

FRANK W. JOY,

Chief of Police.

FREE PUBLIC LIBRARY.

TRUSTEES' REPORT.

The larger appropriation granted by the town at the annual meeting in March for the purchase of books for the Public Library has enabled us to make larger additions than usual, and, as a natural consequence, the public interest has been more general and the circulation has been considerably increased. Through the courtesy of the local press, lists of the books added have been printed, promptly and correctly, from time to time as the additions have been made.

Early in the year we availed ourselves of an excellent opportunity to complete our set of bound volumes of Harper's Monthly Magazine. Later we purchased the lacking volumes of the New England Magazine. The eighty-five volumes of the former are full of information relating to the greatest men and most important events of the last forty-two years, while the latter is especially rich in the local history of Massachusetts and New England. The unusually large number of magazines donated by friends, who have repeatedly favored us in the past, has also added considerably to our magazine literature. The indexes to Harper's and the Atlantic, purchased during the year, makes their contents more readily available.

It is to be regretted that so many families do not appreciate the importance of having catalogues of the library in their own homes. Were its contents more generally known a much larger number of our citizens would find both pleasure and profit in availing themselves of its privileges.

The books were again carefully examined at the close of the year. None have been lost, and, while some are badly worn, only a few are unfit for further service. About twenty-five volumes will need rebinding.

Books have been delivered at the Clifftondale post-office every Wednesday since last April. Through the kindness of the Postmistress, Miss Fisk, the only expense to the town has been for the transportation of books. Citizens of Clifftondale, if not personally known to the librarian, may secure cards entitling them to receive books by sending their names with the endorsement of Miss Fisk.

The current expenses of the library have been somewhat larger than usual. That the people might be informed concerning the previous additions it was necessary to print a supplementary catalogue early in the year. As a larger number of books has been purchased, the cost of cataloguing has been proportionately greater. Eighteen dollars were paid for the transportation of books to Clifftondale. To these three causes the increased expenses has been chiefly due.

No addition has been made to the shelf-room since the library was fitted up in 1887. It has already been necessary to remove from the shelves a considerable number of the books to make room for more recent accessions. More shelves should at once be provided.

The advance made by our library during the past year is a cause for hearty congratulation. We doubt whether any department of the town has been conducted more economically or has benefited a larger number of her citizens in proportion to the money expended. The Trustees earnestly desire that the present prosperity may continue. For various reasons it seems advisable that the appropriation for 1893 should be made sufficient to provide for the current expenses as well as for the pur-

chase of books. We therefore recommend that \$500, in addition to the dog tax be appropriated for the Public Library, with the provision that its current expenses shall be paid from this appropriation.

Carriages	.	.	16,902	a loss of	1,228
Live stock	.	.	56,995	a loss of	6,176
Wood, lumber, etc.	.	.	22,771	a gain of	10,658

\$252,128 total loss of 23,886

Total value of assessed estate May 1, 1892, \$2,718,062

Total value of assessed estate May 1, 1891, 2,609,647

Showing a net gain of \$108,415

As follows :—

On buildings	.	.	\$90,555	
On land	.	.	41,746	Gain of \$132,301
On personal	.	.		Loss of 23,886

Net gain \$108,415

BASIS OF TAXATION.

Amount of appropriations	. \$44,740 00
State tax	1,977 50
County tax	2,372 23
Overlay	1,080 29
	<u> </u> \$50,170 02

Apportioned as follows:—

On real estate	\$40,687 91
On personal estate	4,160 11
On polls	2,322 00
Town's income	3,000 00
	<u> </u> \$50,170 02

Total tax for State, County and Town purposes committed to A. Dudley Johnson, Collector \$47,170 02

Total population as taken by the Assessors,
May 1, 1892 3,876

At the annual meeting in March last one hundred dollars was appropriated for the purpose of obtaining plans and looking up titles. Of that sum \$36.14 has been expended. A portion of this amount was used in defining boundries, location and extent of property, to aid the collector in securing claims against estates liable to be sold for non payment of taxes.

Considerable time has been spent in searching the records for transfers and untaxed property. Investigations thus far are quite satisfactory. Fine pieces of marsh land were discovered—three of them taxed and the balance placed on file for future assessment.

Eight new plans of streets and house lots have been secured at a cost of \$12.75. Others on on a large scale are contemplated. For the Assessors' and Collector's use plans of this kind are indispensable; they afford the means of obtaining an accurate description of house-lot

location, boundries and the number of feet contained in each lot. This is important where land is sold at prices ranging from five to fifteen cents per foot.

Over fifty parcels of real estate have changed hands since the first of last May, a large number being held by non-residents. These estates will require further attention, the dates of transfer should be known, for it is much better to assess property to the real owners than to owners unknown.

During the past year substantial progress has been made in building operations; fifty-four dwelling houses were erected, an excess of thirty-nine over the previous year. Eighty-nine house lots have been sold, affording a larger increase in taxable property, the land heretofore having been assessed by the acre at one-fourth its present value. The outlook for further improvement in land values and building operations, judging from present appearances, is encouraging.

It will be seen by the table of aggregates that the increase of real estate the year past was \$132,301. The apparent decrease of personal property amounts to \$23,886, showing a net gain of \$108,415.

The regular increase in taxable property during the past four years has enabled the Assessors to reduce the tax rate from \$20.00 per thousand to \$16 50. Shall we be able to make a still lower rate for 1893? Of this there is some doubt, unless the appropriations are kept within a reasonable limit. This can be done if the legal voters so desire. If we must have an increase in our expenditures by reason of town improvements or otherwise, let them be to the extent of our ability to pay, bearing in mind—'tis the tax payers who pay the bills.

Complaint is often made that our valuation is too high. That may be true. Should we change the present system and make a general reduction in values, the rate would increase in like proportion. It makes but little difference

to the property owners, whether taxes are based upon a high valuation or *vice versa*, the result financially, would be the same.

Those who are impressed with the idea that they are taxed higher than their neighbors who own similar property must be aware that careful comparisons are made in the appraisal of such estates, the location and surroundings are fully considered. It is impossible to secure exact equality, or proportion, in the levy of *all* taxes based upon valuation. Assessments are made upon property in accordance with the best information obtainable, as to its true value, with the idea of making the burden of taxation as nearly equal as possible.

An extra room for the Assessors use is very much needed, not only for their benefit, but for the convenience of those having business with the Assessors, without being obliged to make a statement of their private affairs in presence of others, as they are now compelled to do.

In accordance with the requirements of the town By-Laws, the Assessors would recommend the appropriation of \$425,00 to meet the estimated expenses of their department, for the year 1893.

BENJ. F. CALLEY,
BENJ. F. ROBINSON,
GEO. P. HAYWOOD,

Assessors.

REPORT
OF THE
SCHOOL COMMITTEE
TO THE
TOWN OF SAUGUS.

For the Year Ending Dec. 31, 1892.

LYNN, MASS:
PRESS OF JOHN F. McCARTY, & CO.
27 CENTRAL SQUARE.
1893.

SCHOOL COMMITTEE.

E. G. SMITH, Committee on Supplies, term expires 1894.
HENRY J. MILLS, Secretary, term expires 1893.
JOHN H. PARKER, . . . term expires 1893.
Truant Officers—E. G. SMITH, HENRY J. MILLS.

The Board meets in its room in the Town Hall, the first Monday of each month, at 7.30 P. M.

SCHOOL REPORT.

APPROPRIATIONS AND EXPENDITURES.

The Committee charge themselves with

Town appropriation . . .	\$9,500 00
From State	106 36
Balance from last year . .	111 00
Error on bill of S. Edmands,	40
	<hr/>
	\$9,717 76

The Committee credit themselves with the following expenditures:—

Salaries—High School . . .	\$1,617 82
Four Grammar Schools	1,440 00
Four Intermediate “	1,331 00
Five Primary “	1,763 00
Two Mixed “	674 50
Music Teacher	288 00
	<hr/>
	\$7,114 32

Books and supplies . . .	\$768 81
Janitors' Salaries . . .	515 75
Fuel	706 64
Repairs on Buildings . .	79 88
Cleaning School Rooms .	86 85
Repairs on Stoves . . .	84 82
Taking School Census . .	25 00
Care of Supplies	45 00
Writing Reports	25 00
Printing	8 00
Express	11 90
Incidentals	27 07
Fitting up Bond's Hall . .	218 97
Balance unexpended . . .	75
	<hr/>
	\$2,603 44
	<hr/>
	\$9,717 75

APPROPRIATION.

In looking over this Town and making a careful comparison we shall readily see that there has been quite a rapid increase in population.

Some of our citizens were astonished when they saw the five hundred children in line on Columbus day, yet we might have increased that number by about two hundred more.

We understand that there has been a demand for more schools, this has meant more money.

The Grammar School that was opened in September in Mr. Bond's hall, Clifondale, called for about two hundred dollars in order to furnish the room for school work, and in addition to this the expenses must be paid from month to month of running another school.

Hence for this year we have judged that it would be necessary to ask for ten thousand and five hundred dollars in order to meet the present demand.

We appreciate the fact that the citizens of this Town have always been liberal in providing for their schools, and we hope that this year they will not fall below the level of their opportunity.

SCHOOL ACCOMMODATIONS.

Many of our educators say that forty scholars for one teacher is enough. The packed condition, the close contact, is not favorable to secure the best results in the school-room. In Ward 2 we have in the Grammar school about sixty pupils. We have had this year in the intermediate school, Ward 2, between sixty and seventy scholars. Now by patience and by cherishing a kindly spirit we shall be able to bear the burden for a season, but these facts indicate to us that in the near future something will have to be done in the way of providing for more room.

The two rooms on Essex St. were rapidly filled. Five years ago we had about twenty-two scholars that attended school in Mr. Penney's house, now we have about ninety pupils in the Essex St. school-house.

But the most serious question that confronts us, at the present time, is in relation to the schools in Cliftondale. The new Grammar school is in need of a permanent home. The hall is pleasant, but a school-room would be delightful. Now while you are meditating, just step into the Primary school in Cliftondale, and look into the faces of between seventy and eighty eager, earnest children.

A dark curtain that extends through the room clouds the faces of the little ones; and when the day is stormy the whole appearance of the place is gloomy.

Now with an arrangement like this we shall not flatter ourselves with the fact that the best work can be done here by these two teachers. This may be the best plan for the present, but the children and the teachers and all who are interested in the best results, plead for better accommodations. Hence if we provide for Cliftondale this year the demands of other parts of the town can be met next year, so that the burden of taxation will not come upon us all at once.

PRIMARY GRADE.

The great majority of those who have children recognize the fact that there are certain laws that must be obeyed. Others seem to forget the rule for our conduct—hence, let us refresh our minds with this language.

“The School Committee shall not allow a child, who has not been duly vaccinated, to be admitted to or connected with the public schools.” We hope that mistakes may be guarded against in the future, as they relate to this matter.

It is a source of satisfaction that our teachers remain with us year after year. In the Primary department our teachers have given a long term of service, so that they have become accustomed to the ways of the little ones, and are able to meet the requirements. The statement is quite frequently made that almost any one could teach a Primary school—most any one can walk about the room; fill the chair occasionally; use the rattan and assist the children when they are preparing to go home—but when it comes to the vital work in the school-room thorough preparation is requisite.

The child in the home needs to have a clear view of what is right and what is wrong. Thus, in the school-room he needs to know the first principles clearly, the methods plainly presented; then he lays a foundation; he starts right, so that we can see the result of this good thorough work in the other schools, but if this is neglected, the child does not receive proper instruction as he commences his work, he will be the sufferer as he advances to the next grade. Hence, as the child enters the school-room we should have in view his welfare, and start him off in such a way as to secure the largest results in the few years that he may remain in school.

INTERMEDIATE AND GRAMMAR SCHOOLS.

These days for the teachers are not entirely perfect. We have Cains and Abels in our schools, hence, on certain occasions the rebellious brother has risen up, being encouraged at home, and has recorded himself as being against the rules of the school.

But these cases of insubordination have only been slight ruffles upon the calm surface of the school life for this year. The most of our teachers have been with us a long time; they understand the situation, and know readily how to decide difficult questions.

Our new teachers are doing well so that throughout the town we have great reason to be very much encouraged. More could be accomplished if the number in some of our school rooms could be reduced ; but as it is we are determined to secure the best results for the children with what we have, hoping for something better in the near future.

When the child reaches the intermediate school many are led to believe that only one step is required to enter the next grade ; now, if we look at this matter for a moment we shall see at once that there is a great deal of hard work to be done, and it requires time and patience in order to fit the child for the next grade.

Some of the parents are very ambitious and we may say very urgent for their scholars to be promoted when they are not fit to take up the work of the Grammar school.

By thus pressing the child into a condition beyond his years or ability we are not helping him, but bringing upon him lasting injury. We have met this same experience in the Grammar School, some of the parents were very much disappointed because their children did not get the required per cent so that they could be admitted to the High school. It is better to be a year later in entering the High school and get a good thorough preparation for the work, than to go there poorly prepared and then drop out in a short time. We need to pay the price of promotion by good thorough work in the school room, then we shall enter the high school with a purpose to remain and give ourselves entirely to the task that is set before us.

HIGH SCHOOL.

Although it is not necessary to say very much about the High School, a word may not be out of place.

The teachers have been with us long enough to prove beyond a doubt that they are deeply interested in the

welfare of the pupils under their care. There is no attempt to rush the scholars through a given study to make it appear that they are doing great things, but the purpose is to take step by step understandingly, get the matter into the mind, then advance when the whole subject is mastered. This is the kind of work that means business in the future life of the pupil.

Some teachers adopt the sliding method for their own ease and gratification, but it is fortunate for us and a blessing to our scholars that they are required to study and reason out these great problems for themselves. We wish them much success in their school work for this year.

ENTHUSIASM FOR THE WORK.

The blessed privilege is before us of moulding and shaping the young mind for service in the future. The teacher's throne reminds us of a crown, yet in this commanding position we do not see that enthusiasm for the work that its importance demands. As a rule with our teachers there is an earnest purpose to rouse the children to do their best work every day, but this is not quite true of our entire number. What may be seen here in a few of our schools is true in other places, yet we feel that a little more life in the service on the part of the teacher would result in waking up some of our scholars from their slumbering condition.

It is said that nothing is so contagious as enthusiasm; it moves stones, it charms brutes and inspires the scholar for service in the school-room. We have seen teachers who seemed to be delighted because they could move their scholars with the rattan—but if we can move them with the touch of enthusiasm for this grand, far-reaching work in the school we may feel that we are laying up treasures in their lives. Now we are sure that a few grains of this enthusiasm well-directed in some of our schools would result in a glorious harvest.

WE NEED THE HEARTY CO-OPERATION OF THE
PARENTS.

It is said that parents should always sustain the teacher in maintaining his authority in the school.

That authority is supreme and may never be trifled with by the pupil. Unconditional obedience in the school, as well as in the family, is the rule, and the teacher has a right to expect the cordial support of all his patrons in enforcing that rule. The best good of the child, as well as the success of the school, depends upon this co-operation.

Parents are too often ready to listen to the complaints of their children, and to sympathize with them in rebellion against the authority of the school. It would be better never to allow such fault-finding, never to criticise, but always to sustain the teacher in the presence of children. If they can have the encouragement of parents in their recklessness at school, they will become bold and defiant, and will paralyze, if they do not destroy the influence and efforts, even of the best teachers.

Obedience and fidelity are required of them in all their relations to the school, no matter under what circumstances they are placed. If all parents should take this view of the subject, and so co-operate and sustain their teachers, our public schools would be vastly more efficient and useful than they have ever been; yet we find, notwithstanding all that is said upon this subject, parents standing in their own light as it relates to this matter, and bring down upon themselves a sad experience.

(1) *Attendance.*

We may understand by a moment's reflection that in order to make the most out of the time that is given us for school work, we must be in our places every day

attending to our studies. Many here in our town see clearly the importance of this idea and act upon it, while others are indifferent or careless and for this thing and that the child is taken away from his work in the school room and finds at the close of the month that he has lost four or five days; this indeed is not the best way, for it hinders the progress of the child.

The teachers are interested in having the scholars in the school every day, and many efforts have been put forth by them to secure this end, but they have had their seasons of discouragement.

A company of workmen were engaged in tunneling a mountain; they worked day after day and week after week, at length they became very much discouraged and had half a mind to give up in despair, when one day they were greatly surprised to hear a pick on the other side and presently light was shining through. When the teachers can feel that the parents are working on the other side, and are indeed at work, the attendance of the scholars will be secured.

(2) *Interest in the Studies.*

The parents may help the teachers very much in their work by interesting themselves in the studies that the children have in school. Within three or four years we have made many changes in books, so to-day we have some of the best in the market.

Why not ask the children about these books and about their lessons day by day and inform ourselves in reference to the work, so as to come into vital contact with the life of the school. If there is trouble in the school it is quickly reported and we look into the matter; why not keep informed of the work done that touches the life of the children. And then "encourage them faithfully to prepare every lesson assigned them and to cherish a deep interest in every school exercise, as a

means to the end in view ;" this indeed would be a source of encouragement to the teachers.

(3) *Visiting the Schools.*

We are very much gratified that so many make their annual visit to our schools ; but we have noticed that this Public day is made to answer for the whole year with many. Now if the parents could visit the schools two or three times a term and give about half an hour to the exercises in the school-room we believe that they would help us in our work.

It is said that "these occasional visits will do more than anything else can do to rouse and encourage the teacher and to inspire the pupils with zeal and earnestness in the discharge of their school duties. Such visits have a decided influence over the deportment of the school. They tend to cultivate pride of character, school pride and self-respect in the pupils, and to check all tendencies to disorder and rebellion." May the thoughts here presented meet with the hearty co-operation of all the parents for the welfare and success of our public schools.

Our dear brother, the Rev. Mr Fowler, was very much interested in these vital themes, and thought along these lines ; he served this town faithfully as one of the Committee until his Father called him to a higher service and a richer reward.

Respectfully submitted,

E. G. SMITH,
HENRY J. MILLS,
School Committee.

TO THE SCHOOL COMMITTEE :—

The Principal's Report of the school under his charge must necessarily refer largely to present needs and the opportunities for desirable changes.

At the same time, to speak of increased facilities for successful work, and the advance gained as the result of changes already made, is a pleasant duty.

With respect to facilities for work the High School has made no more decided advance, within recent years, than in the line of Books of Reference. During the year just closed, the proceeds of the Bond Prize Exhibition have enabled us to add to our list the Century Dictionary.

Taking into account the increasingly attractive list of works in History, Literature and Science contained in the Public Library, to which, by courtesy of the Trustees, the schools have easy access, few schools in the smaller towns have better opportunities for consulting authorities outside of the regular text-books.

This fact is all the more gratifying, as books of reference are of constant use in every department of school work. The use of physical and chemical apparatus is necessarily greatly limited by the short time which can be devoted to these subjects in a two, or three years' course, and by the fact that we have no laboratory, without which, a large amount of apparatus can neither be stored, or used to the best advantage. For these reasons we have been the more content to make but few additions to the modest though valuable equipment which we already have, while spending the most of our available resources in adorning the walls of the school-rooms and adding to our School Library.

The majority of the pupils, especially in the two upper classes, have seemed to appreciate the value of regular and punctual attendance. It will be noticed however, that the per cent of attendance is considerably

lower than that of previous years, this is due largely to sickness, which was unusually prevalent during the winter term. At the same time, a few have frequently been absent with no sufficient excuse. In more than one instance, pupils fell behind their classes and failed of promotion at the close of the school year, as the result of absence, apparently unnecessary. For the same reason, others who might have ranked high, gradually lost interest in their work, and either left school altogether, or were content with a standing much lower than the average.

Parents who would be among the first to recognize the necessity of punctuality and regularity in any ordinary business, write excuses for their children's absence without giving any *valid* reason, but are greatly disappointed at the close of the school year, if their children rank lower than others of equal ability.

As in former years, a *few* are accountable for nearly all the tardiness; six pupils all of the junior class, and less than one-tenth of the whole number, being responsible for *two-thirds* of the entire amount. There was *not a single instance* of tardiness in the two upper classes during the spring term, but *one* in the fall term, and *only four* during the *entire year*.

The reduction of the time allowed for the study of French has been attended with two advantages:—a longer time has been available for the study of English Language and Literature—an extention greatly needed—while the pupils are more mature, and better prepared to take up a new language at the beginning of their second year of High school work, and are consequently able to advance much farther in proportion to the time spent upon it.

We believe that the English Course of study, as arranged at present, furnishes too little change to the pupils coming from the Grammar schools. Many of

them, looking forward to a life of business, are anxious to begin at once the study of Book-keeping. In many of the towns about us, elementary Book-keeping is in the Grammar schools; it is only natural that our pupils should desire the privilege of taking up this study in the first year of the High school.

We recommend that Arithmetic be dropped entirely from the High school course, except as it is necessary in connection with book-keeping, and that such other changes be made as will permit the study of book-keeping during the whole of the first year. Were this done, we believe that more of the Grammar school graduates would enter the High school, that fewer would drop out before becoming fairly interested in their work, and consequently, a larger number would persevere to the end of the course.

No satisfactory course of High school work can be arranged, however, until the time given us for doing that work is lengthened. At least four years are needed for our classical course, and three for the work in English. During four years out of the last five, graduates have returned to avail themselves of the very limited advantages, which we have been able to offer them for further study. Pupils are continually going from Saugus to the public schools of other towns, that they may have the opportunity to prepare for college, or to take up branches of study not provided for by our High school. Some of these branches we shall soon be *obliged* to teach, if the official returns of the Census of 1895 shall show, as they doubtless will, that our population exceeds four thousand. Saugus did not wait to be *compelled* by law to *establish* her High school; we believe it would be more *wise*, as well as more graceful, to provide at once for the study of Greek, and to so extend our course as to give our children equal privileges with those of neighboring towns.

Of course the extension of time and the increase in the number of branches taught, would soon necessitate the employment of a third teacher. Improved educational privileges, like all other improvements of any value, will bring increased expense, but we do not believe that our people, while expending money so freely and constantly for conveniences and improvements in other directions, will be willing that the *mere matter of expense* shall prevent their children from enjoying the best opportunities for educational training.

It is unnecessary to dwell at length upon other conditions which limit the work of the High school. As in the past, the lack of thorough preparation, on the part of a large proportion of the pupils, hinders the work of the whole. The lack of laboratory privileges, as previously intimated prevents the *best* work in some of the natural sciences. Give us the same time for our work which other schools receive, let that time be devoted *exclusively to High school studies*; let our pupils have the privilege of fitting for college and the scientific schools, and we shall not only see a larger proportion of the Grammar school graduates in the High school, but fewer will need, or care, to attend school elsewhere.

WILBUR F. GILLETTE,

Principal of High School.

REPORT OF MUSIC TEACHER.

TO THE SCHOOL COMMITTEE:—

In making my second report I feel that the results from the year's work are quite satisfactory.

In the Primary and Intermediate grades the scholars are making excellent progress, and it is pleasant to see the interest the children take in the work.

We are doing better work in the Grammar grades than last year, as I have become better acquainted with the heads of the schools and can work in a more systematic and thorough manner.

In Ward 1 I have thought best to divide the school into two classes, the Primary and Grammar.

We are doing much the same work as last year in the High School, and trust some improvement will be noticed at the close of the year. Since the beginning of my work I have ever had the co-operation of the teachers, and before closing my report, wish to express again my appreciation of their assistance; also to thank you for interest and encouragement in my work.

Respectfully submitted,

EMMA L. PEARSON,

TEACHER OF MUSIC.
